

TAICHI RIDING GEAR COLLECTION 2017-18 Autumn / Winter

SAFETY with Style

Safety comes first. Comfort is essential.

But that isn't good enough.

Your gear has to reflect and enhance
your individual style, too.

 **TAICHI**

Safety, Comfort, Style.

Pursuit safety and comfort

CONCEPT

Safety, Comfort, Style.

There are many factors that makes riding gear valuable.

Choose your style.

Get fitted with protective gears.

The latest collection of riding gear, superior in engineering and design, beckons you to get out on the road with your fellow riders.

The safety comes first.

The most important factor of motorcycle riding gear is safety. RS TAICHI was first among the Japanese motorcycle riding gear manufacture that has adopted European CE approved protectors to reduce the damage of body in an accident. We have been appealing how important it is to protect the chest because the second biggest cause of death in motorcycle accident is the injury in the chest.

With the riders' vision.

Since 1975, our intention for product development of motorcycle riding gears has not changed. We always have "You" in our mind and develop products with rider's vision to produce products with high safety and comfort. Product development never ends.

We produce what is really wanted.

Taichi Yoshimura, the founder was a former factory motocross rider. Playing an active part in the professional racing made his product development philosophy to be "No compromise". Our strong spirit to "Produce the products riders want." is the power to make high quality products with originality.

For the future of riding motorcycle, to share the dream with riders.

RS TAICHI is not a manufacture that only makes products nor only sells products. Our role is to share the Dreams with riders and to create Sportive Culture through motorcycling.

RS TAICHI HISTORY

For the future of riding motorcycle, to sharing the dream with riders .

1975

Developed separate type and surface reinforced type TECCELL Chest Protector.

PROTECTOR SYSTEM

LIGHTEST

prEN1621-3:2015 Full Chest Type B Level 2 approved chest protector in the market.

"Chest Protector" A Must Need to protect your life

Helmet and protectors are a must need to enjoy safe riding. No. 1 reason of death in motorcycle accident was injury in the head and No. 2 was injury in the chest. As you can see from this result, wearing chest protector is as important as wearing a helmet to protect your life. Despite of this result, riders wearing chest protector are only few percent of riders wearing helmet. We will continue development of chest protectors to deliver high level safety and comfortable chest protectors to riders.

TAICHI CE Protector continues evolution

TAICHI CE Protector has evolved to the next level. The new anatomical shape allows the protector to fit the body and follows the body movement. Adopting a new material allowed to make the protector thinner yet maintaining the impact absorption area required by CE. RS TAICHI's challenge will never end.

FRONT SIDE BACK

NOW THE SEASON

Hop on the bike and go out for a ride.

Enjoy the latest collection of
Autumn / Winter riding gear with Style and Comfort.

Masterpiece for safety riding

What RS TAICHI can do for comfortable riding

Fiber absorbs the moisture from body and generates into heat

Heat Generator is RS TAICHI's original material developed for riders. It is made by considering the mixing rate of the fiber and thickness of the fabric to provide the best heating value and heat retention for winter riding. Wicks away the extra moisture so that the body does not cool down from sweating.

Teflon HT

High-Tech Fabric Protector

Teflon water repellent treatment for unexpected wet weather

Every nylon fabric used for RS TAICHI products are treated with Super Water Repellent treatment. This water repellency will protect you from getting wet in unexpected short rains.
