

RAIN GEAR

s e r i e s

DRYMASTER-X is a Polyurethane based waterproof membrane with many microscopic pores. These pores are smaller than a water droplet, but larger than a water vapor molecule, which makes the DRYMASTER membrane durably waterproof, while allowing perspiration to escape from the inside. DRYMASTER uses special nonporous membrane. It demonstrates high waterproofness and moisture permeability.

DM Waterproof 20,000mm (L-1092 JIS)
DRYMASTER-X Breathable 10,000g/m²/24h (tested B-1 JIS)

DM Waterproof 10,000mm (L-1092 JIS)
DRYMASTER Breathable 10,000g/m²/24h (tested B-1 JIS)

※Above numbers are spec of the fabric and does not assure the performance of the product. ※These specs do not apply to gloves using DRYMASTER.

Not only Waterproof, the aim is Comfort.

Not only the waterproof property, RS TAICHI rain gears are designed for more safety, comfort, mobility, and ease of use.

Features of Waterproof bags

Tarpaulin(PVC)

Tarpaulin is a material coating the base fabric with resin which is extremely durable material, used for trucks and tents that does not absorb any water or dirt.

Reflective Material

Prism type reflective material offers superior performance in wet weather conditions.

Roll Closure

The roll closure is a simple, effective and highly versatile means of keeping the inside separate from the outside. Large opening makes it easy to put contents in and out of the bag.
